APR Energy expands turnkey power plant in Myanmar

Jacksonville, FL – [APR Energy](http://www.aprenergy.com), a global leader in fast-track power solutions, is pleased to announce that it has commissioned a 20 megawatt expansion of its power plant in Myanmar, providing the Myanmar Electric Power Enterprise (MEPE) with a guaranteed minimum of 102MW of power generation.

Based in Kyaukse, in the Mandalay region, the expanded power plant is one of the largest thermal plants in Myanmar, providing electricity to over six million people. It features the newest generation CAT low-emission mobile [gas power modules](#) and runs on Myanmar's indigenous, clean burning natural gas. APR Energy's plant has been in operation since May, 2014.

Clive Turton, Managing Director Asia Pacific at APR Energy, said: "Expanding contracts is an important part of APR Energy's strategy and business model, together with new contracts and renewals. The added capacity at our Myanmar plant follows our previously announced expansion in Indonesia earlier this year, and is the result of growing regional demand and the high level of service we provide. We look forward to playing a continued role in helping Myanmar supply reliable, efficient power to its people and industries, supporting economic growth and improving overall quality of life."

About APR Energy

APR Energy is a global leader in large-scale, fast-track power solutions, providing customers with rapid access to reliable electricity when and where they need it. APR combines state-of-the-art, fuel-efficient technology with industry-leading expertise to provide turnkey power plants that are rapidly deployed, customisable and scalable. Serving both utility and industrial segments, APR Energy provides power generation solutions to customers and communities around the world, with an emphasis on Africa, the Americas, Asia-Pacific and the Middle East.
